

# House Addition Project - Before and After

Addition room for a single-family house built by

## Construction Step 1

**Step 1: Digging the foundation trenches for the new addition and preparing the site.**

## Construction Step 2

**Step 2: Pouring the foundation for stability and support.**

# Construction Step 3

Step 3: Setting up the base structure and support beams.

# Construction Step 4

Step 4: Building the frame of the new addition.

# After Photos - Completed Project

Completed addition showing the newly built deck and steps.

**Close-up of the new sliding doors installed as part of the addition.**

**This side view showcases the completed addition room. The new addition features a modern deck with steps leading into the backyard. Notice the seamless integration of the new structure with the existing house, providing additional living space while maintaining architectural harmony.**
